

<b>Course title:</b> Network Economics	<b>Neptune code of course:</b> GTGKG250MLA Institute of Economic Theory and Methodology
<b>Course coordinator</b>	<b>Course type:</b> elective Zoltan Bartha, PhD <a href="https://gemi.uni-miskolc.hu/zolibartha">https://gemi.uni-miskolc.hu/zolibartha</a>
<b>Syllabus:</b>	<a href="https://gemi.uni-miskolc.hu/netecon">https://gemi.uni-miskolc.hu/netecon</a>
<b>Recommended semester:</b> Spring	<b>Precondition:</b> -
<b>Number of lessons/semester:</b> 9+0	<b>Acknowledgement of course completion:</b> presentation & single choice written exam
<b>Credit value:</b> 3	<b>Training format:</b> part-time
<b>Issued</b>	1 February 2024
<b>Aim and content of course:</b> The course presents general microeconomic and macroeconomic models that have special importance in the age of networked computer systems and shows the challenges the society and the labour market face in the next decade. Having finished the course students will have a good understanding of the way information- and knowledge-related businesses work and will get to know methods that help to reap the benefits of the networked economy.	
<b>Competences to be developed:</b> <b>Knowledge:</b> <i>Students have comprehensive knowledge of the most important interconnections between the economic system and the various branches of society.</i>	
<b>Skills:</b> <i>Students have relevant knowledge and are prepared to actively participate in social and public life. They can recognize and understand social problems and new phenomena.</i>	
<b>Attitudes:</b> <i>Students are open and receptive to new results of business and economics</i>	
<b>Autonomy and responsibility:</b> <i>Students have formulated their professional opinion on well-known economic phenomena and are able to defend it in an open debate. They take responsibility for decision made in complex and fuzzy situations.</i>	
<b>Schedule of the semester &amp; thematic description of course content:</b>	
	<b>Lecture:</b>
24 Feb 8:30-13:30 A1/311	Digital knowledge/information as a key resource - economic consequences The age of the intelligent machines – trends Key features of the digital age – economic impact The benefit of the new technologies – how to measure it The spread – costs and dangers What should we do to be prepared? - an outlook on jobs and skills Microeconomics approach: knowledge resources and cost structure Increasing returns & scalability Pricing, consumer and producer surplus, Lock-in, path dependence Network effect, standards
11 May 12:20-14:50 A1/311	Test Student presentations
<b>Extraordinary circumstances amendment</b> The information provided in the syllabus was prepared with in-person teaching in mind, and may change if online teaching is introduced. Students will be notified in Neptun about the changes in the latter case.	
<b>Method and evaluation of in-semester assessment:</b> <i>Requirements for obtaining the signature:</i> at least 5 presentation points  Students are required to make a presentation on a previously agreed topic.	

**Suggested topic of the presentation:** AI and the future of business

**Format of the presentation:** PPT, 10-15 minutes (10-15 slides)

**Student task:** Pick a company/organisation that could benefit from artificial intelligence; present the following: 1) brief description of the organisation and the market you chose; 2) what is the core business idea – how does it work; 3) how can AI help in improving efficiency/generating customer value/scaling up the business? 4) overall evaluation about the company/market/idea: do you see a great potential in the idea? Would you recommend investing money in it, and if yes, why? What potential threats and weaknesses can you identify?

Always cite & reference your sources.

**Deadlines:**

- Finalising the topic of presentation: 10 April (you will not be able to complete the course if you do not have a topic by this date)
- Sending the PPT to [zoltan.bartha@ekon.me](mailto:zoltan.bartha@ekon.me): 8 May  
(The maximum points that can be obtained for the presentation (15) is decreased by one with every day that you are late with)
- Presentation: for time & place see the schedule of the course (page 1)

If the presentation is not given on the agreed date, the signature is denied. The only way to make up for the lost presentation points is to write a 30-page (~10,000 words) essay on the same topic, discussing the same issues as it was required in the presentation. The essay is declined if any plagiarism is detected.

Deadline for the essay: 30 May

Completion requirements and evaluation criteria for seminar grades and exams: you may only take the exam if you obtained a signature from the course

Oral/written exams, or specific methods/practices applied during the course:

Students have the option to write a midterm exam (see the course schedule about the exact date), or they can write the final exam during the exam period. The midterm and the final exam have the exact same structure, it includes 15 single choice questions (pick the correct answer from four options; each correct answer is worth 1 point) focusing on key definitions, examples, logical exercises. The time available for the test is 20 minutes.

The final grade is calculated as follows:

- Presentation (max. 15 points)
- Midterm or final test (max. 15 points)

The point structure is the following: 30-24 excellent; 23-21 good; 20-18 satisfactory; 17-15 pass; 14-0 fail.

For Erasmus students the following ECTS grading scale will be used: 30-27 excellent – A; 26-24 very good – B; 23-21 good – C; 20-18 satisfactory – D; 17-15 pass – E; 14-0 fail – F
